

FREELANCE CREATIVE AND MARKETING OPERATIONS

Rollan Justin Guzman

I make the content that gets a service business noticed, then build the system that turns the attention into booked appointments.

CREATIVE PROFILE

Editing, design, and automation – under one workflow.

ABOUT

Video editor and creative operations specialist working with service businesses — home services, weddings, real estate, and the agencies that run their campaigns.

I combine traditional editing and design with generative AI and prompt engineering, then build the CRM pipelines and automated follow-up that sit underneath the content.

TRACK RECORD

Four years of client work, mostly remote.

● APR 2026 – PRESENT · REMOTE

Video Editor

Zen Companies

- Cut short-form video, Meta ad creative, and promotional content for social.
- Design the static ads, carousels, and motion graphics that run alongside the video.
- Use generative AI for text-to-video, image-to-video, and AI character work, with prompt workflows that keep output consistent and platform-ready.

● APR 2026 – SEP 2026 · REMOTE

Social Media Manager and Automation Specialist

APEX Leads Group

- Ran Facebook and Instagram for multiple client accounts on a publishing schedule.
- Onboarded clients into GoHighLevel: CRM accounts, pipeline stages, workflows, and lead-nurture email sequences.
- Trained Appointwise AI agents for SMS qualification, objection handling, and scheduling.

● JUN 2025 – APR 2026 · REMOTE

General Administrative Virtual Assistant

Wedding Workflows

- Built onboarding, contract, and invoicing automations in Dubsado and HoneyBook.
- Edited Reels, wedding highlight films, and promotional assets to brand standard.
- Managed Facebook, Instagram, and TikTok, plus inbox and client communication.

● OCT 2024 – NOV 2025 · FLORIDA, US — REMOTE

Graphic Designer

RGD Air Conditioning / R&A Air Co.

- Designed a year of marketing posters, offer graphics, and social assets for an HVAC company.
- Worked with the marketing team on concepts and held output to the brand guide.

● JUL 2024 – APR 2026 · CAGAYAN DE ORO

Student Ethics Head

Xavier University – Ateneo de Cagayan

- Oversaw student conduct and investigated complaints, mediating conflicts and applying sanctions fairly and confidentially.

● JAN 2025 – MAR 2025 · CONTRACT

Podcast Video Editor

YouTube podcast hosted by a licensed psychiatrist

- Cut episodes for retention while keeping the tone clinically appropriate.
- Added captions, graphics, and lower thirds for clarity and accessibility.

● JUL 2022 – DEC 2022 · CAGAYAN DE ORO

Outbound Call Center Agent

GTS Linkedsys

- Outbound calling with a focus on clear, patient customer handling — the grounding for the objection-handling work I build into automations now.

CAMPAIGN DESIGN · R&A AIR CO.

A year of social output for a home services brand.

Seasonal offer — install promotion with bundled add-ons and one booking action

Paid ad — energy cost angle, built for the Meta feed placement

Proof post — before and after a coil replacement

Educational carousel — maintenance tips built to earn saves

The thinking behind the set

A home services feed has to do four jobs at once: prove the work is good, teach something useful, stay top of mind between service calls, and make the offer easy to act on. Rather than designing posts one at a time, I built a repeatable format for each of those jobs, so the account could publish consistently without the brand drifting or the design time climbing.

PROOF, AWARENESS, RANGE

Reviews as creative, and work outside the home services brief.

Review graphic — five-star quote over field photography

Review graphic — longer testimonial, named customer

Service overview — three services, one enquiry action

Awareness post — indoor air quality explainer

Engagement post — trivia format written to lift comments

Question post — thermostat settings, seasonal hook

Real estate — listing card with property features

Real estate — new listing announcement

Editorial poster — flat-colour type and illustration study

MOTION

Stills from short-form edits.

Kinetic caption edit — typographic hits timed to the beat

Mood cut — desaturated grade with hand-set lyric type

Vertical short — cut for Reels and TikTok

Short-form lives or dies in the first second, so I cut for the hook first and build the rest of the edit backwards from it. Captions are set by hand rather than auto-generated, because the timing of a word appearing is part of the rhythm.

Everything is delivered in the aspect ratio and safe margins of the platform it is going to, with a horizontal variant when the same footage has to work as an ad.

SYSTEMS

What sits behind the content.

Editorial pipeline in Airtable — topics, keywords, and status views from planning through to published

Content only compounds if a system is holding it. On the accounts I run, that means one board where every piece has an owner, a keyword target, and a state — planning, in progress, drafted, published.

The same applies after the click. In GoHighLevel I set up the pipeline stages, the email and SMS sequences that fire against them, and the Appointwise agent that qualifies a lead and puts it on the calendar.

AVAILABLE FOR FREELANCE AND RETAINERS

Let's talk about what you need built.

Send me the brief, or the account that isn't performing. I'll tell you honestly whether it's a creative problem or a follow-up problem, and what I'd do about it.
